

HAPPY EASTER EVERYONE

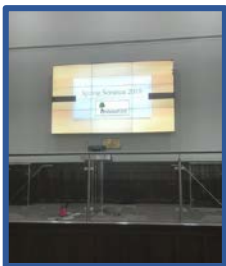

We hope you had a wonderful Easter break and have a Spring in your step as the lighter, brighter months' approach.

EVENTS

Spring Seminar - Innovation

Abigail Shaylor of XCAM kicked off this year's seminar series with a talk regarding developments towards the PFO 1000 particulate fall-out monitor followed by placement student Lewis Kidson, currently at DAJO Solutions, making an unforgettable debut and finally Derek Wise from MAHLE Powertrain gave a fascinating talk entitled "Innovate or Die" showing just why companies need to keep developing in an ever changing market. All speakers delivered fantastic interesting angles on the theme Innovation with tremendous feedback from students and partners.

TEAM NEWS

Dan has been in China delivering course content to our overseas partners modelling our new NETP branded polo tops!

Key dates for the term:

MIA event – Silverstone 25.04.18

BSc 2nd placements start – April

Exam period commences

NETP meeting 17.05.18

Check out our industry links:

Placements

Placement interviews for the second half of the year were conducted throughout March ensuring students looking to gain experience are placed by the end of April.

End of placement reviews were also undertaken with some absolutely fantastic comments. Glad to see all our second year students have really thrived out in industry.

Year 1

First year interviews took place in February and what a difference the Skills Sessions have made. The partners were thrilled with the standard of students they saw and are looking forward to seeing a good set of results at the end of year two.

Good luck with exams everyone!

STEAM

The Big Bang Northants Event at Silverstone was a huge success with visitors in excess of 4000 from local primary and secondary schools. The UoN Engineering department had a stand and were joined by industry partner Mark Whitehead from DAJO Solutions. Any students wishing to get involved in STEM activity please contact Linda Davis-Sinclair and get yourselves signed up. Looks great on your CV, is lots of fun and could even win you an award!

RS Components

The NETP Team visited RS Components in March and are very excited to form this new link. They are already heavily involved in STEM activity and are looking at the facility of offering placements across various departments.

The Big Bang - Silverstone

INFINIS

Graham Bone visited the University in March looking for ways in which we can work together. Infinis is a leading renewable power generator & the largest generator from landfill gas in the UK. They will play an active role in the governments decarbonisation targets for 2020. Exciting times!

Out & About in the County

Dan & Danielle spent some time visiting partner company Recol. They caught up with 2 of the Universities placement students, had some brilliant feedback and enjoyed a tour of the premises to see the facilities offered not just to year 2's but our Formula Student Team!

Thank you Louise and the Recol team.
